# CSC317Project

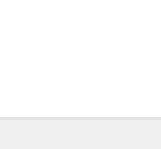

Node  Upgrade your instance →

goleador / CSC317Project  main  <https://csc317-node-app.onrender.com> 

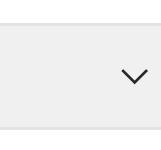

## Settings

### General

**Name**  
A unique name for your Web Service.

CSC317Project 

**Region**  
Your services in the same region can communicate over a private network.

Oregon (US West) 

**Instance Type**

**Free**  
0.1 CPU 512 MB 

ⓘ Please ask the owner (artilheiro@yahoo.com) to enter their payment information.

ⓘ See remaining free usage, or learn about free service limits.

### Build & Deploy

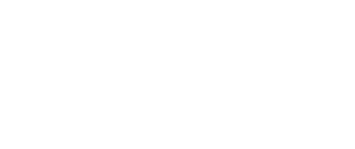

**Repository**  
The repository used for your Web Service.

<https://github.com/goleador/CSC317Project> 

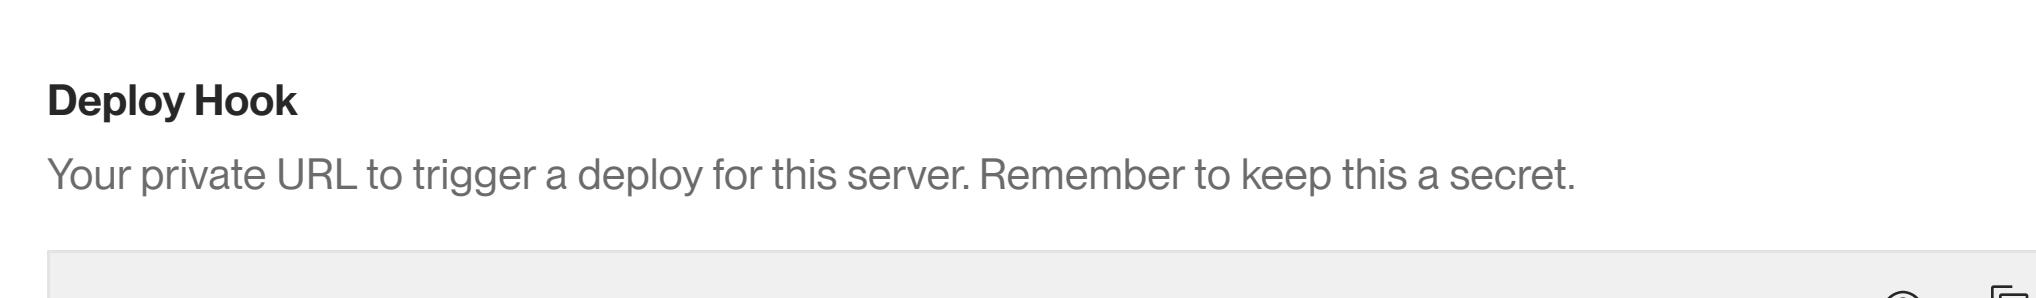

**Branch**  
The Git branch to build and deploy.

main 

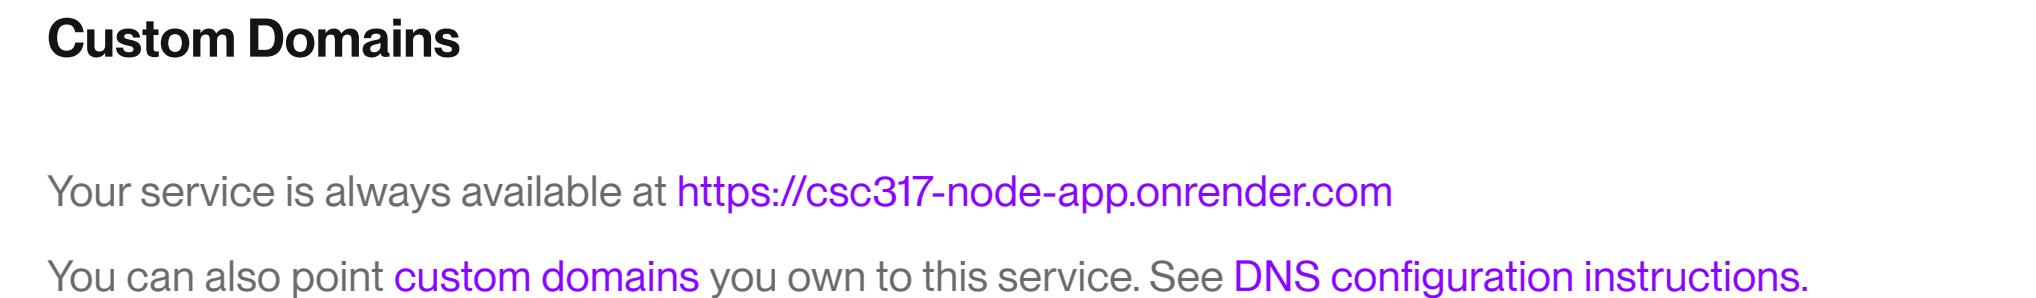

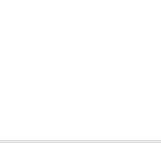

**Git Credentials**  
User providing the credentials to pull the repository.

artilheiro@yahoo.com (you) 

**Root Directory** Optional  
If set, Render runs commands from this directory instead of the repository root. Additionally, code changes outside of this directory do not trigger an auto-deploy. Most commonly used with a monorepo.

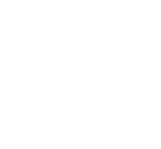

**Build Filters**  
Include or ignore specific paths in your repo when determining whether to trigger an auto-deploy. Paths are relative to your repo's root directory. [Learn more](#).

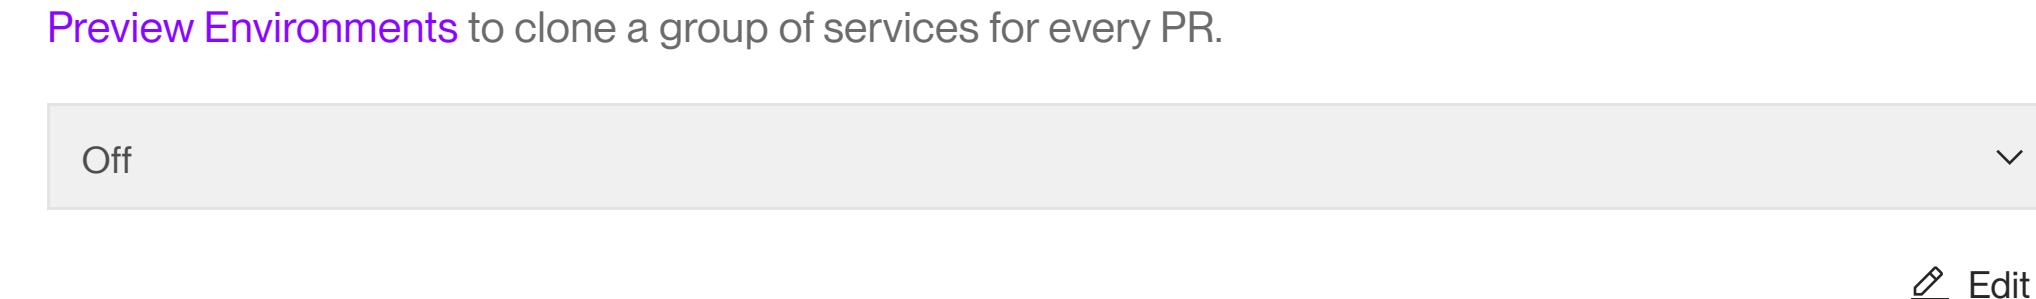

**Included Paths**  
Changes that match these paths will trigger a new build.  

**Ignored Paths**  
Changes that match these paths will not trigger a new build.  

**Build Command**  
Render runs this command to build your app before each deploy.

\$ npm install 

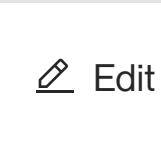

**Pre-Deploy Command** Optional  
Render runs this command before the start command. Useful for database migrations and static asset uploads.

\$  

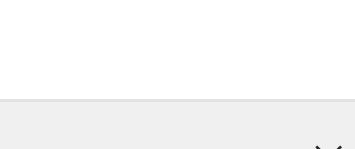

**Start Command**  
Render runs this command to start your app with each deploy.

\$ node app.js 

**Auto-Deploy**  
By default, Render automatically deploys your service whenever you update its code or configuration. Disable to handle deploys manually. [Learn more](#).

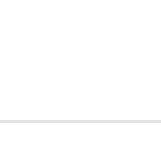

Yes 

**Deploy Hook**  
Your private URL to trigger a deploy for this server. Remember to keep this a secret.

.....  

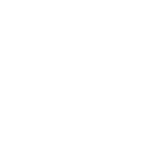

**Custom Domains**

Your service is always available at <https://csc317-node-app.onrender.com>  
You can also point custom domains you own to this service. See [DNS configuration instructions](#).

+ Add Custom Domain 

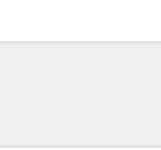

**PR Previews**

**Pull Request Previews**  
Spin up temporary instances to test pull requests opened against the main branch of goleador/CSC317Project. Choose Automatic to preview all PRs, or Manual for only PRs with [render preview] in their title. [Pull Request Previews](#) create a new instance for just this service. Use [Preview Environments](#) to clone a group of services for every PR.

Off 

**Notifications**

**Service Notifications**  
Set notifications to receive for your service. This setting will override your workspace's default settings.

Use workspace default (Only failure notifications) 

**Preview Environment Notifications**  
Configure notifications for [preview environments](#) and [service previews](#).

Use account default (Disabled) 

**Health Checks**

**Health Check Path**  
Provide an HTTP endpoint path that Render messages periodically to monitor your service. [Learn More](#).

/healthz 

**Maintenance Mode**

**PAID** Maintenance mode is only available for paid instances.
