## Environment

+ Create environment group

### Environment Variables

Edit

Set environment-specific config and secrets (such as API keys), then read those values from your code. [Learn more.](#)

Key	Value	
MONGODB_URI	.....	🔗
NODE_ENV	development	🔗
SESSION_SECRET	.....	🔗

### Secret Files

Store plaintext files containing secret data (such as a `.env` file or a private key).

Access during builds and at runtime from your app's root, or from `/etc/secrets/<filename>`.

+ Add ↘

### Linked Environment Groups

Environment groups are collections of environment variables and secret files that you can share across multiple services.

No environment groups available to link.
